

INFORMS Journal on Data Science

Title Page & Author Identification File

(Submitted separately per IJDS Double-Anonymous Review Guidelines)

Manuscript Title:

Spectral Diagnostic Trajectories: Multi-Modal Hypergraph State-Space Tracking, Context Decoupling, and Congestion Mitigation in Stochastic Clinical Service Systems

Authors and Affiliations:

1. Hemanth Manchabale Papachappa (Corresponding Author)

Graduate School of Engineering / Biomedical Informatics Program, Stanford University, Stanford, CA 94305, USA

2. Aniruddha Ganguly

Department of Computer Science and Engineering, Jadavpur University, Kolkata, West Bengal 700032, India

Email: ganguly.aniruddha@gmail.com

Target Journal: *INFORMS Journal on Data Science (IJDS)*

Manuscript Category: Research Article

Key Contact Information:

- **Corresponding Author:** Hemanth Manchabale Papachappa
- **Mailing Address:** Stanford University, Stanford, CA 94305, USA

Acknowledgements: The authors express their gratitude to the Laboratory for Computational Physiology at the Massachusetts Institute of Technology, Beth Israel Deaconess Medical Center, and the Department of Intensive Care Medicine at the University Hospital Bern for maintaining and providing research access to the MIMIC-IV, MIMIC-CXR, and HiRID repositories. We also thank the clinical and technical reviewers whose feedback improved the operational queueing formulations.

Funding and Financial Support: This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors.

Conflicts of Interest / Competing Interests: The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

Ethical Oversight and Compliance: This study is a computational methodology and in-silico simulation study in healthcare operations research. No human subjects, live patient medical records, or clinical interventions were involved. Consequently, Institutional Review Board (IRB) review and individual informed consent requirements were not applicable.
